wheat rise and fall together has been knocked higher than GILDEROY'S kite While silver last week touched the lowest point known for over three years sh wheat has advanced fully 25 cents a bushel. Our Popocratic howlers will have to set up a new howl or else go where people do not read the news

THE contributions of the Montan and Colorado members of the Silver estimated at \$600,000 by The New York World, which gives names and amounts. Hear! Hear! What means this? We thought the altogether virtuous BRYAN was running in opposition to "Trusts! And here's the biggest Trust of all "whacking up" for his election !

ACCORDING to the census reports wages in the manufacturing industries of the United States increased 51 per cent. from 1870 to 1880, and 39 per cent. from 1880 to 1890. The annual average was \$328 in 1870 and \$484 in 1890. And yet the Bryanites have the effrontery to claim that these wages have gone down since 1873 and ask werkmen to vote for free silver, which would in ffect reduce wages 50 per cent. where it did not wipe them out altogether by closing up the factories.

In expressing his regret that his en ents would not permit him to accept an invitation from the Wage earners' Patriotic League of Maryland liver an address at Baltimore, Sec ary CARLISLE said:

weary Carlisle said:

"If there is any laboring man in the United States whe really believes the money he receives for his toil is too good, that it will buy too much food and clothing for himself and family, or pay rent for a better house than he should have, then it is his duty to vote for free and unlimited coinage at the rails of 15 to 1. If there is any laboring man who has saved money out of his earnings, and has deposited it in a savings bank or in a building and ions association or a life insurance policy for the protection of his family, and he dealers to have the proceeds of that in-visit the same of the processor of the same of the processor of the same of the processor of the coinage of allers at 16 to 1."

There is no got in this world equal to the who really believes the wives for his toll is too will buy too much for himself and family, or a better house than he nit is his duty to vote in this term of the temporal of

The Ledger's Leaflets—No. 27.

The Republican party has been legislating to make the dollar dearer. . . . Senator Sherman said January 25th, 1890, "If our present currency is estimated at \$1,400,000,000 and our population is increasing at the rate of 3 per cent. per anum, it would take \$42,000,000 increased circulation each year to keep pace with the increased population." . . What provision has the Republican party made for the supply of the money that we need? None whatever.—Mr. Bryan's Greensboro, N. C. Speech.

There was added to the metallic currency of the country last year \$66,196,781, or 50 per cent. more than sufficient to "keep pace with the increase of the population." In the preceding year, 1894, the amount added to it was \$89,184,988, or more than twice the amount needed for this purpose. There has not been a year since the repeal of the Bland Law in which the increase from the coinage of gold alone was not much more than enough to keep pace with the growth of population. The reduction of the money of the country and of that in circulation is due to the fact that the Tariff law which Mr. Bryan helped enact brought enormous quantities of foreign goods into the country and took money out of it to pay for them instead of keeping it at home and circulating it among the workingmen at the mills and factories, as did the Mc-

John G. Carlisle said in 1878: "The absolute and instantaneous destruction of one-hall the entire movable property of the world would not produce anything like the distress and disorganization that must inevitably result from the permanent annihilation of one-half of the metallic money of the world." And yet the Republican party has pledged itself to join in a conspiracy to destroy this money unless other Nations come and help us save our people.—Bryan's Buffalo Speech.

Mr. Carlisle doubtless thought in 1878 that the world would suffer if the use of silver as a money should be suspended; but it has not been suspended, and there is no intention by anybody that it shall be. On the contrary, the silver money of the world, which amounted to \$2,500,000,000 in 1878, now amounts to \$4,070,500,000, and is being increased at the rate of over \$100,000,000 a year. The silver money of the world has thus greatly increased since 1878. There is much more money in the world for each individual today than there was in 1878. The Republican party has not pledged itself to join in any conspiracy against silver, as Mr. Bryan asserts, but to co-operate with those European Nations which have recently expressed a desire for an increase in its use. Every European Nation of prominence has within the past few years expressed a desire for international bimetallism, and the time is ripe for it.

A CONTRAST

Between the Treatment Given Insurgent Prisoners

And That Accorded to the Spanish Soldiers by the Rebel Leaders.

Correspondence of the United Associated HAYANA, Oct 20.—To show the contrast between the treatment accorded to rebel prisoners by the Spaniards and that shown to Spanish capitives by the insurgent leaders the following recent incidents are mentioned. In the fight which Gen. Melquizo had with Gen. Melquizo had with Gen. Melquizo had with Gen. Melquizo had with Melquizo captured 40 rebels whom he ordered shot on the spot, and in the recent engagement between Macco's troops and the Spaniards, under Gen. Bernal, the latter caused 22 prisoners to be shot, including a young girl and two older women. Bernal says that his soldiers before ahe was captured and killed. With the 40 men killed by Melquizo there were four women and a child, but he does not know whether the child was abandoned in the woods or killed. They tried to force the women and in the soldiers were four women and a child, but he does not know whether the child was abandoned in the woods or killed. They tried to force the women and his plans, but the only words they got out of them were that the Spaniards were cowardly dogs, and this so enraged Melquizo that he ordered them shot immediately, they all dying with the cries of "Vive Cuba Libra."

The Cubans pursue an exactly consequence of the contrast of the contrast of the contrast of the contrast of the cubant of the contrast of the cubant of th ence of the United As

trary course, as the following recent case gives evidence:
Perico Delgado, commanding one of Maceo's brigades in a fight, esptured a lieutenant-colonel named Penichet, of the line and seven volunteers. The lieutenant-colonel, on account of his extraction, and the seven volunteers were killed, but the 19 regular Spanish soldiers were returned to Maj Dolzo of Mediculzo's staff, after being disarrande.

KENTUCKY FOR M'KINLEY.

RMAN SAM J. ROBERTS SIZES THE SITUATION.

Chairman Sam J. Roberts of the Republican State Executive Committee, in response to a telegraphic request from The New York Press, sent the following to that paper Saturday night. It is the first authoritative statement given out by the State Committee and is regarded as a conservative statement of Republican probabilities in Kentucky. Following is

KENTUCKY FOR M'KINLEY. LEXINGTON, KY., Oct. 17th, 1896.

New York Press, New York: The Republican State Executive Committee has made no claim as to the size of the ma jority in Kentucky, but it has a growing confidence that the state is safe for Mc-Kinley and Hobart. Our poll of the state, the declarations of voters as they registered in cities and towns, the con-ceded strength of the Sound Money Democratic movement and the drift of our correspondence with the party or ganization encourage the belief that we shall win a spindid victory for McKinley, Sound Money and Protection. The much advertised Free-silver Republican defection is a myth. Two per cent. of last year's Republican vote, or less than \$2,500, is an extravagant figure, and many contracting the state of the s correspondence with the party or defection is a myth. Two per cent. of last year's Republican vote, or less than 3,500, is an extravagant figure, and many of our best informed men say it will not reach 1 per cent. The Sound Money Democratic element certainly includes 20 per cent. of the old time Democracy, or upward of 35,000 votes, but as some of these rejected Hardin last year and voted with the Republicans, their votes helped to make up Governor Bradley's 8,000 plurality. There is every reason to believe will be a defection of 15 per cent. or over 24,000 votes, from last year's Democratic vote, which will just offset the vote cast for Weaver in 1892, the high water mark of the Populists, who are this year fused with the Silver Demo crats. The Republican loss from Free silver defection and scattering Populists who voted with the Republicans last year on state issues, will, I believe, be fully balanced by Populists who reject fusion and who will either stay at home on elecand who will either stay at home on elec-tion day are vote only for members of Congress in the Western districts of the state, where they are strong and have several aggressive Congressional candi-dates. Of the 24,000 increase in the Sound Money Democratic element over last year, the most conservative esti-mates gives McKinley 50 per cent., or 12,000 votes, leaving an equal number for Palmer and Buckner. On the basis of these conservative calculations I believe McKinley and Hobart will increase ernor Bradley's majority by such ortion of the Sound Money Demo-as decline to take any chances by ag for the Indianspolis ticket. Our the past few days have been ex-

IN CAESARIA.

their best speakers into that hitherto neglected section, and the reported change of sentiment there amounts to thittle short of a political revolution. From our point of view it is impossible to figure out any other result in Kentaky than a great victory for McKinley and Hobart, Sound Money and Protection.
